SECTION 4: First aid measures

4.1 Description of first aid measures

If inhaled

 Remove person to fresh air. If signs/symptoms continue, get medical attention.
 Keep patient warm and at rest.
 If breathing is irregular or stopped, administer artificial respiration.

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

| Pers | onal precautions | Evacuate personnel to safe areas. Use the indicated respiratory protection if the occupational exposure limit is exceeded and/or in case of product release (dust). Do not breathe vapours, aerosols. Refer to protective measures listed in sections 7 and 8. |
|----------|----------------------|--|
| 6.2 Envi | onmental precautions | |

| Environmental precautions | Try to prevent the material from entering drains or water courses. |
|---------------------------|--|
| | Local authorities should be advised if significant spillages cannot be contained. |

6.3 Methods and material for containment and cleaning up

| Methods for cleaning up | : | Clean up promptly by sweeping or vacuum. |

| | | Keep in suitable, closed containers for disposal. |

6.4 Reference to other sections

For personal protection see section 8.

SECTION 7: Handling and storage

| 7.1 Precautions for safe handling | | | | | |
|--|--|--|--|--|--|
| Advice on safe handling : | For personal protection see section 8. Smoking, eating and drinking should be prohibited in the ap- plication area. Wash hands and face before breaks and immediately after handling the product. | | | | |
| Hygiene measures : | Wash face, hands and any exposed skin thoroughly after handling. | | | | |
| 7.2 Conditions for safe storage, inc | luding any incompatibilities | | | | |
| Requirements for storage : areas and containers | Store in original container. Keep container closed when not in use. Keep in a dry, cool and well-ventilated place. Containers which are opened must be carefully resealed and kept upright to prevent leakage. Store in accordance with the particular national regulations. Keep in properly labelled containers. | | | | |
| 7.3 Specific end use(s) Specific use(s) : | Specific instructions for handling, not required. | | | | |

| Engineering measures none | | |
| Personal protective equipn | nent | |
| Eye protection | : | Tightly fitting safety goggles |
| Hand protection Material Break through time Protective index | | Nitrile rubber > 10 min Class 1 |
| Remarks | : | For prolonged or repeated contact use protective gloves. The break through time depends amongst other things on the material, the thickness and the type of glove and therefore has to be measured for each case. The selected protective gloves have to satisfy the specifica- tions of Regulation (EU) 2016/425 and the standard EN 374 derived from it. |
| Respiratory protection | : | Not required; except in case of aerosol formation. |
| Filter type | : | Filter type P |
| Protective measures | : | The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace. Choose body protection in relation to its type, to the concen- tration and amount of dangerous substances, and to the spe- cific work-place. |

SECTION 13: Disposal considerations

| 13.1 Waste treatment methods | | |
|------------------------------|---|--|
| Product | : | The product should not be allowed to enter drains, water courses or the soil. |
| | | Waste codes should be assigned by the user based on the application for which the product was used. |
| Contaminated packaging | : | Packaging that is not properly emptied must be disposed of as the unused product. Dispose of waste product or used containers according to local regulations. |
| | | The following Waste Codes are only suggestions: |
| Waste Code | : | used product, unused product 12 01 12*, spent waxes and fats |
| | | uncleaned packagings 15 01 10, packaging containing residues of or contaminated by hazardous substances |
